YOU CAN HELP!

Just imagine...

- avoiding social situations out of fear of having to introduce yourself

- having friends, family speak on your behalf

- choosing career paths that minimize communication demands

- being silent when knowing inside, that you have a million things to say

Did you know that there are programs for people who stutter; but the cost for an average individualized and group speech therapy programs range between $500 - $1,500?
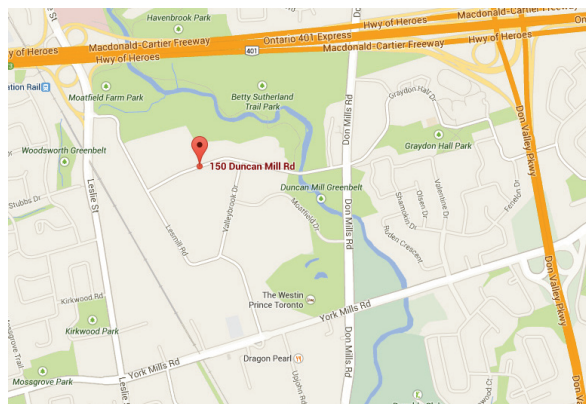

Did you know that involvement in a speech therapy program can make a significant difference in the quality of life in a person that stutters?

The clinical involvement and support of the Speech and Stuttering Institute means that people who stutter are able to live productive and engaging lives as a result of evidence-based individualized speech therapy methods.

Significant funds are required to provide speech therapy services to those afflicted with stuttering, who often find themselves on long wait lists. With additional funds, their needs will be met sooner.

Help us achieve our financial goal of $15,000.00.
